

From Challenge to Green Opportunity

Green entrepreneurship enables SMEs to respond to sustainability challenges by developing innovative solutions, supported by collaboration and ecosystems that create new business opportunities and strengthen competitiveness.

1. CHALLENGE

Sustainability pressures are increasing:

- Resource constraints
- Regulatory requirements
- Changing market expectations

These challenges require businesses to adapt and rethink traditional practices.

2. ENTREPRENEURIAL RESPONSE

Businesses respond through innovation:

**New products
and services**

**Circular and
sustainable
solutions**

**Improved
processes
and business
models**

Entrepreneurship turns challenges into opportunities for growth.

3. ECOSYSTEM SUPPORT

Innovation is supported by a wider ecosystem:

- Public policies and incentives
- Education and knowledge providers
- Business networks and partnerships
- Access to finance

Collaboration helps accelerate sustainable change.

4. BUSINESS IMPACT

Green entrepreneurship leads to:

Increased resilience

Access to new markets

Improved competitiveness

**Long-term business
opportunities**

Sustainability becomes a driver of value creation.

Green sectors are among the fastest-growing areas of the global economy.
