

Why Sustainable Decisions Are Difficult

Understanding Behaviour in SMEs

THE PROBLEM

We know... but we don't always act

- People understand sustainability
- But behaviour does not always change

Gap between:

Decision → Action

From
intention
to action

DECISION

A COMMON SITUATION

What happens in SMEs?

Manager:
decides to improve
sustainability

Employees:
continue old habits

Result:
Decision ≠ Implementation

BARRIERS

What stops change?

DRIVERS

What supports change?

ORGANISATIONAL CULTURE

Culture shapes

If sustainability
is visible →
people act

If not →
it is ignored

Culture =
everyday behaviour

FROM DECISION TO ACTION

How to make it work

Small steps → real change

REFLECTION

Sustainable decisions work only
when behaviour changes

Ask yourself:

- ✓ What influences my decisions?
- ✓ Do habits affect my behaviour?
- ✓ What could I change?
