

Resource Efficiency in SMEs: Key Basics

Simple energy actions **reduce costs** and **environmental impact**. Renewable energy can support these efforts.

1

ENERGY USE

Where energy is used daily:

- Lighting
- Heating & cooling
- Equipment

Practical improvements:

- Efficient lighting
- Switching off when not needed
- Regular maintenance
- Staff awareness

EFFICIENCY ACTIONS

2

3

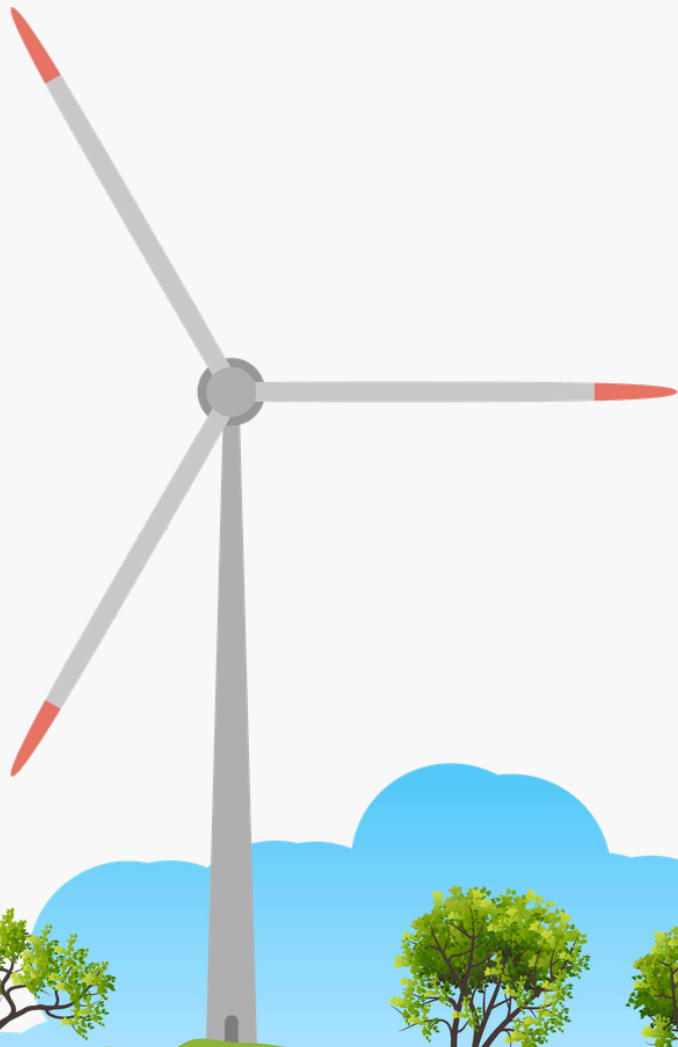

BENEFITS

- Lower energy costs
- Reduced energy use
- Lower emissions
- Stronger business resilience

Lighting upgrades can
cut electricity use by
up to

50%

RENEWABLE ENERGY

- Solar panels
- Small-scale solutions
- Supports efficiency efforts
